# TWIN DISC SPREADERS

The **BMC twin disc spreaders** have been designed for the distribution of solid granulated fertilizers and seeds with total precision.

The **BMC twin disc spreaders** have passed all quality control checks and all the engineered features are perfectly detailed in accordance with the norm 2006/42-CE for agricultural machinery.

**The BMC twin disc spreaders ensure a perfect and uniform distribution.**

**All the elements in contact with the fertilizer are made of stainless steel, that ensures a long life for the gearbox.**

**The BMC twin disc spreaders offer a perfect scattering up to 36 m.**

## serie **KOPA**

The fertilizer spreaders of the KOPA Series are machines with a very big capacity. They are the most appropriate for big extensions and for tractors of 100 CV.

The hoppers are made of sheet of steel and are submitted to an antioxidant treatment with pulverized paint.

The frames are made of steel and are submitted to an antioxidant treatment.

MODELS	KOPA 1500	KOPA 2000	KOPA 2500	KOPA 3000
R.P.M. per disc	720	720	720	720
